BA in Econ., Philosophy & Pol. Sci., University of Zurich	08/2015 - 06/2018

WORKING PAPERS

“From Prompt to Portfolio: Generative AI and Retail Investment”

Generative AI has become one of the most rapidly adopted technologies, and this adoption extends to financial advice. I study the staggered adoption of generative AI for financial advice by retail investors and its effects on their investment decisions and portfolio allocations. Using linked records of investors’ prompts, AI answers, transactions, and portfolio holdings, I find high rates of advice implementation. This implementation shifts new investment toward low-cost, well-diversified equity funds, with corresponding changes in portfolio holdings.

WORK IN PROGRESS

“LLM Agents as Traders in Experimental Asset Markets”

“Lowering the Cost of Entry: Evidence from AI Adoption by Construction Firms”
with Dean Parker

PROFESSIONAL EXPERIENCE

Senior Research Analyst , Federal Reserve Bank of New York	07/2021 - 09/2022
